

Int. Appl. No. : PCT/EP2004/007699
Int. Filing date : July 13, 2004

AMENDMENTS TO THE CLAIMS

1. **(Original)** Paper comprising:
 - a) a paper substrate and
 - b) a preparation applied to at least one side of the paper substrate over the entire surface and containing at least one surfactant and at least one pigment having a particle diameter of from 1 to 500 nm, the preparation containing a binder in a ratio to the pigment of not more than 5 parts by weight of binder : 100 parts by weight of pigment (based in each case on the solids content).
2. **(Currently amended)** Paper The paper according to Claim 1, wherein ~~characterized in that~~ the preparation has a coat weight of from 0.5 to 20 g/m² (absolutely dry) per side.
3. **(Currently amended)** Paper The paper according to Claim 1 ~~or 2~~, wherein ~~characterized in that~~ from 0.05 to 2.5 g/m² (absolutely dry) of surfactant are present per side in the preparation.
4. **(Currently amended)** Paper The paper according to Claim 1 ~~any of the preceding claims~~, wherein ~~characterized in that~~ the surfactant is an anionic, cationic, nonionic or amphoteric surfactant.
5. **(Currently amended)** Paper The paper according to Claim ~~any of Claims 1 to 4~~, wherein ~~characterized in that~~ from 0.45 to 17.5 g/m² (absolutely dry) of pigment are present per side in the preparation.
6. **(Currently amended)** Paper The paper according to Claim ~~any of Claims 1 to 5~~, wherein ~~characterized in that~~ the pigment has an overall cationic and/or anionic and/or nonionic charge.
7. **(Currently amended)** Paper The paper according to Claim ~~any of Claims 1 to 6~~, wherein ~~characterized in that~~ the pigment is an oxide and/or mixed oxide of a metal and/or an oxide and/or mixed oxide of a semimetal/semiconductor.
8. **(Currently amended)** Paper The paper according to Claim 1 ~~any of the preceding claims~~, wherein ~~characterized in that~~ the preparation contains at least one further additive.
9. **(Currently amended)** Paper The paper according to Claim ~~any of Claims 1 to 8~~, wherein ~~characterized in that~~ the paper substrate contains at least one filler.

Int. Appl. No. : PCT/EP2004/007699
Int. Filing date : July 13, 2004

10. (Currently amended) Paper The paper according to Claim 9, wherein ~~characterized in that~~ the filler has a cavity volume.

11. (Currently amended) Paper The paper according to Claim 9 ~~der 10~~, wherein ~~characterized in that~~ the filler has an oil number, measured according to DIN EN ISO 787-5, of from 10 to 150 g/ 100 g of filler.

12. (Currently amended) Paper The paper according to Claim ~~any of Claims 9 to 11~~, wherein ~~characterized in that~~ the filler is selected from the group consisting of chalk, precipitated chalk, clay, talc, calcined clay, alumina, aluminum hydroxide, gypsum, hydrated alumina, silica, silicic acid, diatomaceous earth, titanium dioxide and mixtures thereof.

13. (Currently amended) Paper The paper according to Claim ~~any of Claims 1 to 12~~, wherein ~~characterized in that~~ the paper substrate contains at least one additive.

14. (Currently amended) Paper The paper according to Claim 1 ~~any of the preceding claims~~, wherein ~~characterized in that~~ at least one further coating is present on the preparation on that side of the paper substrate on which the preparation is applied.

15. (Currently amended) Paper The paper according to Claim 14, wherein ~~characterized in that~~ the coating contains at least one pigment and at least one binder.

16. (Currently amended) Paper The paper according to Claim 15, wherein ~~characterized in that~~ the pigment has a particle diameter of from 1 to 500 nm and is preferably selected from the group consisting of oxide and/or mixed oxide of a metal, oxide and/or mixed oxide of a semimetal/semiconductor and mixtures thereof.

17. (Currently amended) Paper The paper according Claim ~~any of Claims 14 to 16~~, wherein ~~characterized in that~~ the coating contains at least one further additive.

18. (Currently amended) Process for the production of a paper, comprising applying ~~the step: application of~~ a preparation containing at least one surfactant and at least one pigment having a particle diameter of from 1 to 500 nm to the entire surface on at least one side of a paper substrate, the preparation containing binder in a ratio to pigment of not more than 5 parts by weight of binder : 100 parts by weight of pigment (based in each case on the solids content).

19. (Currently amended) The process ~~Process~~ for the production of a paper according to Claim 18, ~~characterized in that at least one further~~ comprising applying a coating is

Int. Appl. No. : PCT/EP2004/007699
Int. Filing date : July 13, 2004

applied on the preparation on that side of the paper substrate on which the preparation was applied.

20. (Cancelled)
21. (Cancelled)
